The advantage of the Church of England MAT Leader Network over other similar professional development programmes is that it blends together the knowledge and skills regarding the business and school improvement elements of the role of being a CEO with the vision of the Church of England. The network events also create the right balance between input from highly credible speakers and the time to engage and network with colleagues and learn from them. Putting people first is a key theme that is relevant to all MATs at any stage of their development.
